# The Health Benefits of Trees

Teresa H. Horton, PhD
Department of Anthropology
Northwestern University
Thorton@northwestern.edu

September 30, 2020 GreenTown Conference

# Take home messages

- Science shows time in nature is essential for our health
- Science reveals the many mechanisms for this
- Science reveals inequities of access to nature correspond to known health disparities
- Nature can help us cope with the COVID-19 pandemic

# **Perspectives of Nature**

#### Features untouched by humans,

- Forests
- Plants and animals
- Still and running water,

- Indoor plants
- Parks
- Gardens

www.a-v-designs.com

## Zip code better predictor of health than genetic code

Harvard, T.J. Chan School of Public Health, 2014

# **Chronic Stress**

### How to Spot Income Inequality From Space? Count the

Trees June 10, 2012, by Theresa Riley

Hyde Park:

Life expectancy: 82 yrs

Median household income: \$48,663

Woodlawn:

Life expectancy: 75 yrs

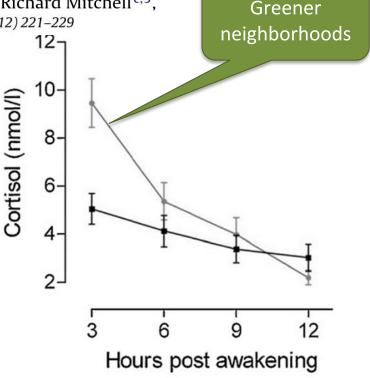

Median household income: \$23,986

http://billmoyers.com/2012/06/10/how-to-spot-income-inequality-from-space-count-the-trees/

More green space is linked to less stress in deprived communities: Evidence from salivary cortisol patterns

Catharine Ward Thompson<sup>a,\*</sup>, Jenny Roe<sup>b,1</sup>, Peter Aspinall<sup>b,2</sup>, Richard Mitchell<sup>c,3</sup>, Angela Clow<sup>d,4</sup>, David Miller<sup>e,5</sup> *Landscape and Urban Planning 105 (2012) 221–229* 

- Flatter cortisol slopes indicate
  - Increased risk of
    - Poor mental health
    - Poor physical health
  - Exposure to chronic psychosocial stress
    - See work by NU Faculty Emma K. Adam, Greg Miller, Edith Chen, and their colleagues.

### Forest Walks Reduced Stress and Anxiety

Sidewalk

**Forest** 

Control (no walk)

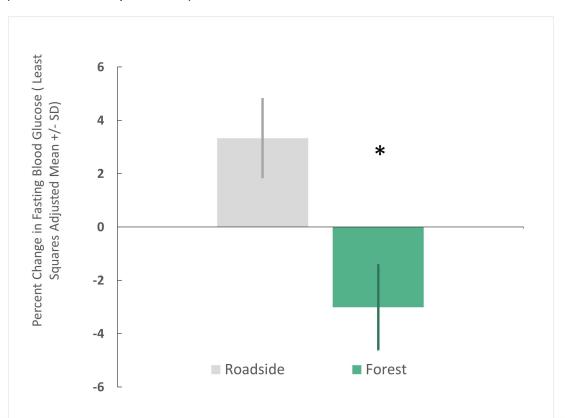

Koselka, et al. (2019). Int J Environ Res Public Health 16(22).

## Forest Walks Reduced Fasting Blood Glucose

(Horton et al. unpublished)

- Participant characteristics
  - N = 38 (20 female)
  - Age (22.9 <u>+</u> 4.6 yr.; range 18-35)
  - % body fat
    - Women 24.02 <u>+</u> 7.04
    - Men 16.6 + 6.97
  - Initial Fasting Blood Glucose:
    - 91.0 <u>+</u> 18.5 mg/dl

### The COVID-19 Pivot

# Parks are essential — especially during the coronavirus pandemic

During the COVID-19 pandemic, parks should be celebrated, protected, and ultimately leveraged to support public health.

By Julia Africa, Cheri Ruane, Gary Hilderbrand, and Chris Reed Updated May 6, 2020, 4:51 a.m.
